Logo

The logo must always appear clearly and have plenty of breathing room. To ensure they are always legible and unobstructed, it is important to size them properly and provide sufficient clear space around logo.

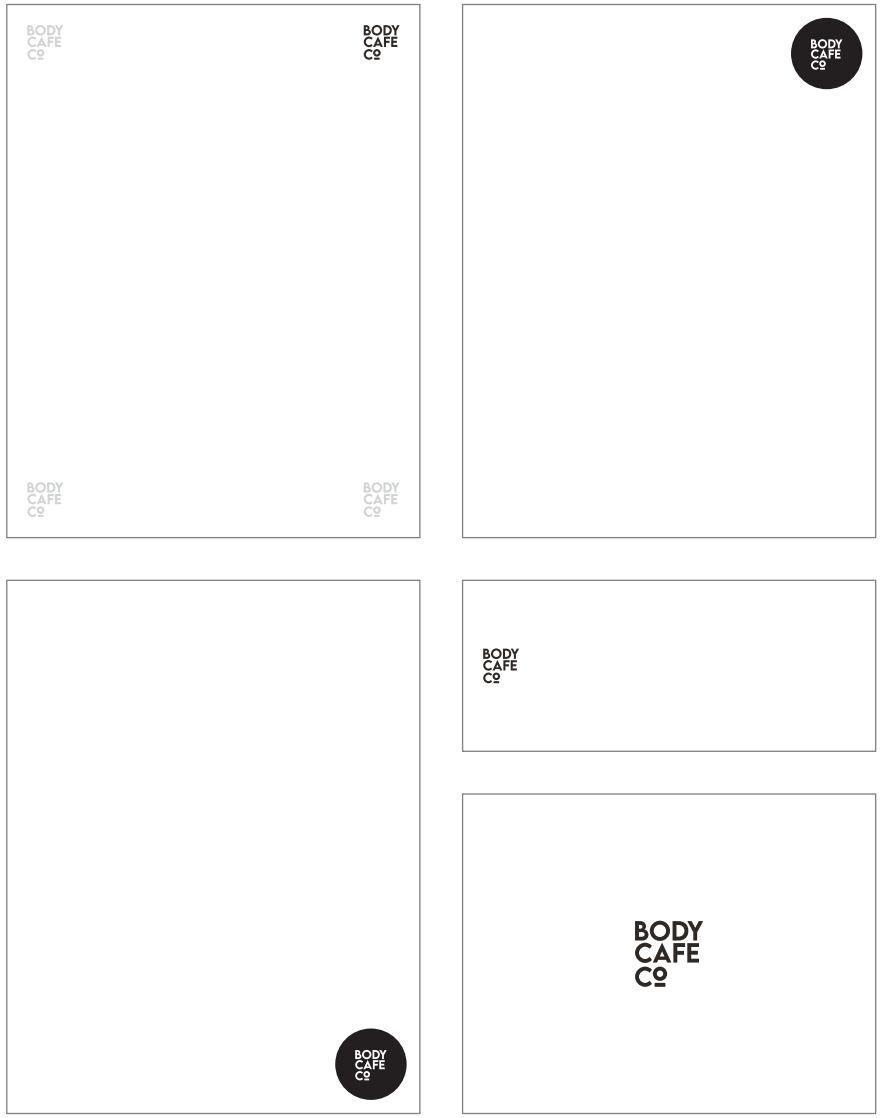

Standard marketing collateral to ensure readability, though it can be as small as 0.5 inches for specialized, simplified applications.

Container logo signature - placement

In design collateral, the ideal placement of the circle container logo signature is top right, and Alternative placements as seen below can also be applied.

These placements enhance consistency and legibility, especially when the circle container logo signature is placed over images and graphics - and they apply to different formats (portrait, landscape, square, etc.).

Container logo signature - minimum size

The logo must have a minimum width of 2.5 cm, whether it is printed inside a circle container or as a standalone graphic.

minimum width 2.5 cm

minimum hight 2.5 cm

Container logo signature - incorrect logo versions

The logo must only be displayed in Black or White, and should always be paired with a background color or image that offers sufficient contrast to maximize visibility.

Colors including Black, White, and our Brand colours are acceptable to pair with the wordmark.

Grayscale imagery, with proper treatment to provide sufficient contrast, may be also be used as a backdrop for the wordmark.

Incorrect logo versions

Do not stretch or skew

Do not rotate

Do not resize or modify elements

Do not use unspecified colors

Do not add effects (dropshadow, bevel, etc.)

Do not outline elements

Do not place over backgrounds lacking contrast
